A Sample Deck

For Testing the b2t Pipeline

John Doe

University at Buffalo

June 2026

Motivation

- Beamer cannot produce tagged, accessible PDFs.
- Typst can.
- This deck exercises the conversion pipeline.

Goals

- Convert plain decks end to end.
- Preserve sections, text, lists, and math.
- Copy included images unchanged.

An Included Image

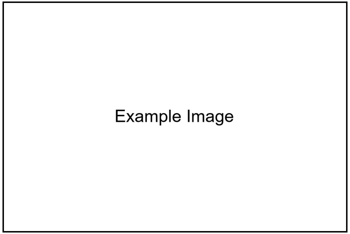

Figure: A sample logo.

A Little Math

The quadratic formula (numbered equation):

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a} \tag{1}$$

and an inline relation $E = mc^2$. Cross reference: Equation 6.
The following equation is not numbered:

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

Citation: Hawking (1975), (Einstein, Podolsky, and Rosen 1935), This[1] is footnote citation.

[1] Einstein, Podolsky, and Rosen 1935.

Special Environments I

Block

This is an example of a block.

Alert

This is an example of an alert.

Example (Example Name)

This is an example of an example.

Theorem (Theorem Name)

This is an example of a theorem. Following is an equation.

$$a^2 + b^2 = c^2.$$

Special Environments II

Lemma (Lemma Name)

This is an example of a lemma.

Corollary (Corollary Name)

This is an example of a corollary.

Definition (Definition Name)

This is an example of a definition.

Proof Name.

This is an example of a proof. $\square$
